

Solution for Email Attachment Error

Step 1: Check File Size and Type

Ensure the files you're trying to attach don't exceed the size limit set by your email provider. Also, check if the file type is supported.

Step 2: Verify Internet Connection

A stable internet connection is necessary for attaching files. Check your connection and try again.

Step 3: Update Email Client or Browser

If you're using an email client or web browser, make sure it's updated to the latest version.

Step 4: Clear Browser Cache or Restart Email Client

For web-based email, clear your browser's cache. If using an email client, restart it to clear any temporary glitches.

Step 5: Try a Different Browser or Client

If you're still facing issues, try using a different web browser or another email client.

Step 6: Compress Large Files

If file size is an issue, compress the files into a ZIP format before attaching.

Step 7: Contact IT Support

If none of the above steps work, contact your IT support for further assistance.
